UI | UX | Design principles | Design Thinking and Research | UX Research | Interaction design | User empathy | Visual design | User testing | Wireframing | Prototyping

Work

money.me

User Experience Design

money.me helps with financial awareness, and empowers the youth to take control of their finances. With a simple and easy to use interface, money.me helps users track expenses, pay seamlessly and assist in saving money using an algorithm.

Covihelp

User Experience Design

Covihelp is an all-in-one solution for managing healthcare needs. It helps connect local communities with medical facilities. Covihelp allows users to connect with professionals, helps book appointments, and manage health records.

Sage

User Experience Design

A decentralized news aggregating platform created by the people, for the people. Users can discover and share news stories from diverse sources, including independent media outlets and citizen journalists.

Aspen

Service Design

A collaborative platform that acts as a talent marketplace. Fostering collaboration in a sustainable manner among budding designers, industry practitioners and academicians.

Hosting zero waste cooperate events

Service Design

Case study on sustainable methods can be used to comply to ESG guidelines, and boost employee value proposition.
